

U.S. AIRBORNE EXPORTS AND GENERAL IMPORTS

March 1975

FT986-75-3

Issued July 1975

Shipping Weight and Value; Customs District and Continent

This report presents statistics on U.S. exports from and imports into the U.S. Customs territory (includes the 50 States, the District of Columbia, and Puerto Rico) by air. The data have been compiled primarily from export declarations and import entries during the regular processing of statistics on foreign trade shipments. Effective January 1975, this report presents data for all individual ports (and Customs districts) through which air shipments were made. Prior to January 1975 data were shown only for those Customs districts having combined exports and imports by air valued at \$1.5 million or more during the preceding calendar year. A complete list of districts and ports is presented in Schedule D, Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics, January 1, 1974 edition, as amended.

Exports

These statistics represent exports of domestic and foreign merchandise combined and include government and non-government shipments of merchandise by air from the United States to foreign countries. The statistics, therefore, include Department of Defense Military Assistance Program Grant-Aid shipments, shipments for economic assistance under the Foreign Assistance Act, and shipments of agricultural commodities under P.L. 480 (The Agricultural Trade Development and Assistance Act of 1954, as amended) and related laws. Shipments to U.S. Armed Forces and diplomatic missions abroad for their own use are not included in the export statistics. U.S. trade with Puerto Rico and U.S. possessions and trade between U.S. possessions are not included in this report, but exports from Puerto Rico to foreign countries are included. Merchandise shipped through the United States in transit from one foreign country to another, when documented as such with U.S. Customs, is excluded. The statistics in this report also exclude shipments by mail and parcel post and exports of aircraft flown out of the country under their own power, as

well as certain types of transactions not considered to be of statistical significance, such as personal and household effects.

The value reported in the export statistics generally is equivalent to the f.a.s. (free alongside ship) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. For exports by air, the port of lading shown in this report is the port where the merchandise is loaded on the aircraft which takes the goods out of the country.

For security reasons, certain commodities are designated as Special Category commodities, for which security regulations place restrictions upon the type of export information that may be released. The data shown in this report for individual Customs ports, districts and continents exclude exports of Special Category commodities, but overall shipping weight and value totals for Special Category commodities are shown. A list of Special Category commodities may be obtained from the Bureau of the Census.

Effective January 1975, the statistics for countries other than Canada reflect fully compiled data for shipments valued \$1,000 and over combined with estimated data for shipments valued from \$251-\$999, based on a 50-percent sample of such shipments. Prior to January 1975, estimated data for countries other than Canada were based on a 50-percent sample of shipments valued \$251-\$499 while data for shipments valued \$500 and over were fully compiled. For Canada, the statistics continue to reflect fully compiled data for shipments valued \$2,000 and over combined with estimated data for shipments valued from \$251-\$1,999, based on a 10-percent sample of such shipments. Shipping weight and value data for major aggregates are also estimated for shipments valued under \$251. These estimates are not included in the data shown for individual Customs ports and districts.

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

U.S. DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce District Office. Price 10 cents per copy. Annual subscription (FT 900, 975, 985, and 986 combined) \$3.00.

Since the export figures shown include estimates based on a sample of low-valued shipments, they are subject to some degree of sampling variability. The table below provides a rough guide to the general level of sampling variability of value totals, on a 2 chances out of 3 basis. Usually the higher value figures will have the lower percent sampling errors.

Value totals for "Total" and "North America" of:	Proportion of cells with sampling variability of:			
	under 2%	under 5%	under 10%	under 20%
\$1,000,000 and over	.60	.75	.85	1.00
\$500,000-\$1,000,000	.20	1.00		
\$100,000-\$500,000	.30	.45	.70	1.00
\$20,000-\$100,000		.35	.70	1.00
Cells of under \$20,000	Are likely to have sampling variability from \$3,000 to \$15,000			

Value totals for continents of South America, Europe, Asia, Australia and Oceania, and Africa of:	Are likely to have sampling variability of:
\$300,000 and over	Less than 2%
\$100,000-\$300,000	Less than 5% with over half of the totals less than 2%
\$20,000-\$100,000	Generally less than 10% with over half of the totals less than 5%
Under \$20,000	Generally \$500 to \$5,000
Cells of \$0	Generally less than \$500

Imports

These statistics represent general imports, which are a combination of imports for immediate consumption and entries into bonded warehouses. The statistics include government as well as nongovernment shipments of merchandise by air from foreign countries to the United States. However, American goods returned by the U.S. Armed Forces for their own use are excluded. U.S. trade with Puerto Rico and with U.S. possessions and trade between U.S. possessions are not included in this report, but imports into Puerto Rico from foreign countries are included. Merchandise shipped through the United States in transit from one foreign country to another, when documented as such with U.S. Customs, is not reported as imports and is excluded from the data. Imports by mail and parcel post and imports of aircraft flown into the United States under their own power are also excluded from this report as well as certain transactions not considered to be of statistical significance, such as personal and household effects.

The Customs value shown in this report represents the value of imports as appraised by the U.S. Customs Service in accordance with the legal requirements of Sections 402 and 402a of the Tariff Act of 1930, as amended. It may be based on the foreign market value, export value, constructed value, American selling price, etc. It generally represents a value in the foreign country, and therefore excludes U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. This valuation is primarily used for collection of import duties and frequently does not reflect the actual transaction value.

For imports by air, the port of unloading shown in this report is the port where the merchandise is unloaded from the aircraft which brings the goods to the United States. The statistics shown for individual Customs ports and districts represent fully compiled data for shipments valued \$251 and over. Data for shipments valued under \$251, reported on formal and informal entries (informal entries generally contain items valued under \$251), are estimated from a 1-percent sample following standard practice. Separate shipping weight and value estimates for shipments valued under \$251 are shown. The shipping weight data are estimated from the values on the basis of constants that have been derived from an observation of the value-weight relationships in past periods.

Since the statistics showing total value of imports by all carriers include sample estimates, they are subject to sampling variability. In general, the higher value figures will have the lower percent sampling errors. Value totals of \$500,000 and over will generally have a sampling variability of less than 3 percent; value totals of under \$500,000 will generally have a sampling variability of less than \$50,000.

Shipping Weight

Shipping weight figures, shown for both imports and exports, represent the gross weight of shipments, including the weight of moisture content, wrappings, crates, boxes, and containers (other than containers such as cargo vans and similar substantial outer containers used for containerized cargo).

The sampling variability applicable to the dollar figures will provide an approximate guide to the reliability of the matching shipping weight figures. For technical reasons, the sampling variability of the shipping weight will be somewhat more than for the dollar value figures.

Sources of Error in the Statistics

Monthly import and export figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to value, shipping weight and other statistical factors, month of inclusion, and errors which may result from the sampling of certain import and export shipments, discussed above. In the case of imports the information as to value (and commodity classification, country of origin, and net quantity) is verified by Customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for Customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile both the import and export statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.
